Technical Lead & Senior Mobile Developer

Results-driven Mobile Application Developer with 10+ years of experience building high-performance iOS, Android, and backend Node.js applications. Proven expertise in leading teams, designing architectures, and delivering secure, scalable, and innovative solutions for the healthcare sector. Specialized in EHR/EMR integrations, HIPAA compliance, and modern UI frameworks. Seeking a challenging opportunity to lead mobile development teams and deliver innovative user-centric apps that exceed client expectations.

Career Summary

- Proficient in Swift, Objective-C, SwiftUI, Combine, Kotlin, Java, and foundational knowledge of Flutter.
 - Extensive experience with Node.js, RESTful APIs, third-party integrations, and payment gateways.
 - Specialized in healthcare application development, integrating EHR/EMR systems like CureMD, Cerner, and Epic.
 - Hands-on experience with Swift Concurrency (async/await), Core Data, URLSession, Auto Layout, and modern UI frameworks.
 - Designed frameworks and reusable components to enhance maintainability and scalability across platforms.
 - Strong expertise in video call frameworks like **Twilio**, enabling real-time communication features across platforms.
 - Successfully led teams, conducted code reviews, and mentored developers to deliver high-quality solutions.
-

Professional Experience**Technical Lead & Senior Mobile Developer — GDKN Corporation / TechRev**

October 2016 – Present

- Led the architecture and development of multiple iOS and Android apps, including Akesa and ListenMD, serving thousands of healthcare professionals.
- Spearheaded integration of Epic and Cerner EHR systems, ensuring seamless data flow and compliance.
- Guided a team of 6 developers, conducting regular code reviews and mentoring.
- Developed Node.js APIs to support mobile frontends, integrating with payment gateways and third-party services.

Software Engineer — Hunka Technologies Pvt. Ltd.

December 2013 – September 2016

- Developed and maintained iOS applications, collaborating closely with teams.

Projects

- **Akesa: Transform Stress — iOS & Android (Swift 5.6, Kotlin)**
Role: Designed and developed the application.
Description: Led the development of Akesa, a mental health app that empowers users to transform stress, anxiety, and fear into resilience using evidence-based tools.
URL: [Akesa](#)
- **SBRM 2023 — iOS (Swift 5.6)**
Role: Designed and developed the application.
Description: Service Business Review Meet 2023 welcomes MSIL employees, recognizing their efforts and achievements, and setting ambitious goals for the upcoming year.
URL: [SBRM 2023](#)
- **eNotary On Call — iOS & Android (Swift 5.6, Kotlin)**
Role: Designed and developed the application, including a cross-platform video call plugin built in native Android and iOS, integrated seamlessly with Angular.
Description: Developed a Notary Public app powered by DEW, enabling centralized, secure, and real-time notarization request management with instant and scheduled request notifications.
URL: [eNotary On Call](#)
- **ListenMD Doctor — iOS & Android (Objective-C, Java)**
Role: Designed, developed, and managed the application.
Description: Developed a HIPAA-compliant communication platform for secure messaging, file sharing, and video calls between doctors, patients, and healthcare teams. Integrated distraction-free messaging, encounter notes, and Medicare billing features.
URL: [ListenMD Doctor \(iOS\)](#) | [Android](#)
- **ListenMD Patient — iOS & Android (Objective-C, Java)**
Role: Designed, developed, and managed the application.
Description: Developed features for patients to record self-assessments, store and share medical records, and communicate securely with doctors.
URL: [ListenMD Patient \(iOS\)](#) | [Android](#)
- **Vigoroom — iOS (Swift 4.0)**
Role: Designed and developed the application.
URL: [Vigoroom](#)
- **Resto-Rat — iOS (Swift 3.0)**
Role: Designed and developed the application.
URL: [Resto-Rat](#)

- **Mar Tool Job — iOS & Android (Flutter)**
Role: Designed and developed the application.
URL: [Mar Tool Job](#)
 - **Stock Scholars — iOS & Android (Flutter)**
Role: Designed and developed the application.
URL: [Stock Scholars](#)
-

Technical Skills

- **Mobile Development:** iOS (Swift, Objective-C, SwiftUI, Combine), **Android** (Kotlin, Java, Jetpack Compose), **Flutter**
 - **Backend Development:** **Node.js**, RESTful APIs
 - **Web Services:** JSON, XML, third-party API integration
 - **UI Frameworks:** UIKit, Core Animation, GCD, In-App Purchases, Push Notifications
 - **Data Management:** SQLite, Core Data, SwiftData
 - **Healthcare Integration:** EHR/EMR systems (CureMD, Cerner, Epic), FHIR, HL7, HIPAA compliance
 - **Cross-Platform Plugins:** Angular, Flutter
 - **DevOps & Tools:** Git, Bitbucket, SVN, SourceTree, CI/CD pipelines
-

Education

- **Master of Computer Application (MCA)** — Samrat Ashok Technological Institute, Vidisha, MP — 8.20 CGPA (2014)
-
